

CONTINUING EDUCATION CURRICULUM

See proposal Impact (PI) reports to view list of courses and/or programs that may be impacted by the following proposed actions.

Human Development

<p>*533 FAMILY HOME DAY CARE TRAINING</p> <p>A comprehensive introduction to issues common to childcare providers, including: licensing, record keeping and insurance; safety, facility preparation and regulations; illness and injury prevention; child growth and development; creative and enriching activities; communication with parents, behavior management and discipline; health, nutrition and the prevention of childhood obesity. This course includes practical guidelines for building and/or working in successful and nurturing childcare environments. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: Course Deactivation <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*575A FOUNDATIONS OF CHILD CARE</p> <p><i>Advisory:</i> ESL Level 6 or equivalent. An introduction to the foundations of early childcare, including: basic child development, health and safety, nutrition, and behavior management and discipline. Course includes practical guidelines for childcare and explores options for careers and vocations in early childcare. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*575B INTRO TO CHILD CARE BUSINESS</p> <p><i>Advisory:</i> ESL Level 6 or equivalent An introduction to topics common to childcare providers, including: licensing, record keeping and insurance; safety, facility preparation and regulations; illness and injury prevention; creative and enriching activities; communication with parents; and menu planning. Course includes practical guidelines for building and/or working in successful and nurturing childcare environments. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*580 INFANT DEVELOPMENT & CARE</p> <p>Students gain knowledge of the physical, cognitive and social/emotional development that takes place during the first year of life. Focus of the course will include ideas for creating a caring and enriching environment that promotes positive infant development and developing skills in family communications, problem-solving and stress reduction for caregivers. Students will explore careers and vocations in Early Childhood Care and Education. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*581 TODDLER DEVELOPMENT & CARE</p> <p>This course provides the student with information on the physical, cognitive, social, and emotional development of children from 12 months of age to 23 months of age (Toddlers). Emphasis is placed on creating safe and nurturing environments and how toddlers learn and develop through play. Students explore careers and vocations in Early Childhood Care and Education. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*582 TWO-YEAR-OLD DEV & CARE</p> <p>Students learn about the physical, cognitive and social-emotional development of the 24-36 month-old, including developmentally appropriate expectations and behavior. Focus is placed on the importance of independence, self-regulation, language development, play and learning, safety, and wellness in two-year-olds. Students will explore careers and vocations in early childhood care and education. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*583 THREE TO FIVE YR-OLD DEV&CARE</p> <p>Course focus is on the physical, cognitive, and socio-emotional development and education of the three to five-year-old child. Emphasis is on learning how to create a nurturing and safe environment which fosters emerging skills and school preparedness. Students develop communication and problem solving skills while planning and implementing developmentally appropriate activities with children in a classroom setting. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course Approved</p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*584 MULTI-AGE DEVELOPMENT & CARE</p> <p>Students learn how to care for and nurture development for multi-age children in an early childhood environment. Emphasis on addressing topics related to the care and nurturing of multiple children include: sibling adjustment, birth order, temperament, family dynamics and parenting styles, communication and stress management, effective discipline and age and gender considerations. Students explore careers and vocations in Early Childhood Care and Education. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course Approved</p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*585 INFANT AND TODDLER BRAIN DANCE</p> <p>With music-based movement and dance, rhythms, rhymes and singing, this course will explore how physical activity supports cognitive learning and social-emotional development in infants and young toddlers. Using multi-sensory props and instruments, students will experience how music and movement promote and sustain early developmental patterns necessary for building a strong foundation between body and brain. Laboratory portion of the course may require students to participate in activities along with children ages 0 to 24 months. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course Approved</p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*586 EARLY LEARNER BRAIN DANCE</p> <p>This course will explore how physical activity supports cognitive learning and social-emotional development in early learners. Using multi-sensory props and instruments, students will experience how music and movement will promote and sustain early developmental patterns necessary for building a strong foundation between body and brain. Laboratory portion of the course may require students to participate in activities along with children ages at least 24 months old. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*590 INFANT/TOD OUTDOOR ENRICHMENT</p> <p>This introductory course focuses on development of the 0 to 24 month old child in outdoor settings. The physical, cognitive and social-emotional benefits of outdoor play and activity for families and children will be emphasized. Students develop ecological and environmental awareness of local outdoor community resources. Students experience, plan and create safe and appropriate outdoor spaces, caring for and stimulating the positive development of infants and toddlers in outdoor settings. Students will explore careers and educational pathways in Early Childhood Care and Education. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*591 EARLY LEARNER OUTDOOR ENRICH</p> <p>This introductory course focuses on development of the 2-5 year-old child in outdoor settings. The physical, cognitive and social-emotional benefits of outdoor play and activity for families and children will be emphasized. Students develop ecological and environmental awareness of local outdoor community resources. Students experience, plan and create safe and appropriate outdoor spaces, caring for and stimulating the positive development of 2-5 year-olds in outdoor settings. Students will explore careers and educational pathways in Early Childhood Care and Education. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: New Course <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*610 NEWBORN TO 12 MONTHS</p> <p>Students gain knowledge of an infant’s developmental process including physical, social/emotional, and cognitive that takes place during the first year of life. Ideas for creating a caring and enriching environment that promotes positive infant development and family strength will be the focus of the course. Developing the skills in family communications, problem solving and stress reduction for new parents will be included. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: Course Deactivation <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*615 12/23 MONTHS/WALKING TALKING</p> <p>This course provides the student with information on the physical, cognitive, social, and emotional well being of toddlers from 12 months of age to 23 months of age. Emphasis is placed on creating safe and nurturing environments. The focus is on active exploration of how toddlers learn and develop through play. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: Course Deactivation <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*620 24 TO 36 MONTHS/DISCOVERING ME</p> <p>Students and children learn together how the transition from babyhood to childhood is made. Focus is on the language learning, play, fantasy and exploration that are part of overall development and become the groundwork for intellectual growth in the two-year old. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: Course Deactivation <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*626 3-5 YEARS-PRESCHOOL EXPERIENCE</p> <p>Course focus is on building skills that strengthen families and prepare the preschool child for kindergarten. Students develop communication and problem solving skills while expanding their knowledge of the preschooler’s social, emotional, physical, cognitive, and language development. The child participates in student planned, age appropriate activities in a preschool environment. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: Course Deactivation <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*630 OUTDOOR CLASSROOM</p> <p>Introduction to the principles of child development and positive parenting through outdoor experiences. The specific benefits of outdoors and nature activities to family life stress reduction, communication and children’s overall development will be emphasized. Children and adults develop an appreciation of nature and ecological awareness by exploring local parks, beaches, canyons and other outdoor places. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: Course Deactivation <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*680 FAMILIES LEARNING TOGETHER</p> <p>Limited English-speaking students and their children learn together in a preschool environment. Emphasis on addressing family issues including parenting, child development, family communications, independent living skills, preparation for elementary school, communicating with school personnel, community resources and Basic English language development. This family learning class is taught in English. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: Course Deactivation <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Human Development

<p>*690 FAMILY COMMUNICATION</p> <p>This course is designed to help family members communicate more effectively by providing them with information and opportunities to practice positive communication techniques in a safe environment. Creative role play, community building, and negotiating techniques will be used to develop the student's communication and conflict resolution skills. (FT)</p>	<p>Offered At: Continuing Education</p> <p>Action(s) Proposed: Course Deactivation <i>Approved</i></p> <p>Originating Campus: Continuing Education</p> <p>Effective: Spring 2021</p>
